EXPERIENCE(Freelance)

E-commerce Application(AliExpress clone)

Live Site: <https://aliexpress-clone-ismail.netlify.app/>

Developed a dynamic e-commerce application using **Nuxt 3**, a powerful framework for building server-side rendered Vue.js applications.

The project integrated:

- **Stripe** for secure and seamless payment processing.
- **Tailwind CSS** for modern, responsive styling.
- **Supabase** for efficient database management and authentication.
- **Prisma** as the ORM for robust and scalable database operations.

Nuxt Movie App

Live Site: <https://my-nuxt-movie-app.netlify.app/>

- **Overview:** Designed and developed a modern web application to showcase popular movies, featuring a responsive grid layout and intuitive pagination system.
- **Key Features:**
 - Integrated the TMDB API to fetch and display real-time movie data, with seamless pagination using Previous/Next buttons and a dynamic 5-page numbered navigation.
 - Engineered a smart pagination system that adapts to the current page, ensuring optimal user navigation.
 - Crafted a polished, responsive UI with Tailwind CSS, incorporating hover effects and a visually appealing star-based rating display.
- **Technologies:**
 - **Nuxt.js:** Leveraged for server-side rendering to deliver a fast, SEO-friendly Vue.js application.
 - **TypeScript:** Implemented to enhance code reliability and maintainability with strong typing.
 - **Tailwind CSS:** Applied for efficient, responsive styling with a modern aesthetic.
 - **REST API:** Connected to TMDB for robust data retrieval and dynamic content updates.

Note:

- My experience primarily comes from freelance work that I have been doing for the past two years. During this time, I have had the opportunity to work on various projects, gaining practical skills and exposure to different technologies in real-world environments.
